### **Snowsound Acoustic Panels Receive GREENGUARD GOLD Certification for Sustainable Building Materials, Finishes and Furnishings**

Certification solidifies [Snowsound](#)<sup>®</sup> as a safe and socially conscious product

September 2015, Santa Fe Springs, CA - A leader in acoustic sound panel technology, Snowsound receives Underwriters Laboratories (UL) [GREENGUARD Gold Certification](#) for low-emitting interior material products that have a significant impact on residential and commercial indoor air quality. This adds another layer to the already environmentally conscious Snowsound product features. The new GREENGUARD Gold Certification is given to the acoustic panels [MITESCO](#)<sup>™</sup>, [FLAP](#)<sup>™</sup>, [FLAP WINGS](#)<sup>™</sup>, [CORISTA](#)<sup>™</sup>, [BAFFLE](#)<sup>™</sup>, [PLI](#)<sup>™</sup>, and [IN](#)<sup>™</sup>, all of which are 100% recyclable and fire and smoke safety compliant.

Backed by the global expertise and rigorous safety testing procedures of UL Environment, the GREENGUARD Gold Certification signifies Snowsound not only meets sustainability and environmental health standards for green buildings, but demonstrates a commitment to the health and well-being of those who live and work in buildings with Snowsound acoustic panels. The certification marks the products compliant with the most stringent low emission and chemical safety standards in the world.

Snowsound's GREENGUARD Gold designation will give architects and interior designers the peace of mind dealing with high quality, socially conscious products that contribute to a healthier indoor lifestyle.

Snowsound Acoustic Panels have received numerous awards, including the 2014 CES Innovations Award for design and engineering, the 2014 Product Innovations Award from *Buildings* magazine, as well as 2014 and 2015 Best of NeoCon Silver Award in the architectural products category.
